

Rule v0.3.2 (three gems) - EN

Overview

You are a gang of thieves roaming the night city.

Evade the police's watchful eyes and keep stealing jewels to build up points each round.

Components

53 cards (39 + 2 + 12)

- 39 Jewel cards: numbers 1–39
 - 3 colors (13 cards each)
 - Each card has its point value (1–3 points) printed on it.
- 2 Boundary cards: 0 card, 40 card
- 12 Police cards: each card shows two colors (left and right), also indicated by symbols.

Objective & Game Length

The game lasts a number of rounds equal to the number of players. (3 players = 3 rounds, 4 players = 4 rounds)

Add up scores across all rounds. After the final round, the player with the highest total score wins.

Key Terms

- Center: Exactly 5 cards are always face up in ascending order.
 - 0, 3 Jewel cards (all 3 different colors), 40
- Zone: The space between two adjacent cards in the Center. Since the Center always has 5 cards, there are always 4 zones.
 - Example: (0, A), (A, B), (B, C), (C, 40) where $A < B < C$
- Zone left/right color:
 - The color of the left boundary card = the zone's left color
 - The color of the right boundary card = the zone's right color
- Unplaced Area: A space (below the zones) where Police cards that cannot be placed in any zone are kept.

Round Setup

Set up each round as follows:

1. Reveal Jewel cards 10, 20, and 30 in the Center in ascending order.

2. Place the 0 card to the left of 10 and the 40 card to the right of 30 to form (0–10–20–30–40).
3. Shuffle the 12 Police cards to form the Police deck and place it face down near the Center.
4. Shuffle all remaining Jewel cards and deal them to players:
 - 3 players: 12 cards each
 - 4 players: 9 cards each
5. Each player chooses 2 cards from their hand and submits them face down to the Center.
 - Shuffle all submitted cards to form the "Shared Hidden Pile." (3 players = 6 cards, 4 players = 8 cards)
 - The Shared Hidden Pile stays hidden during the round and is not used for scoring, face-down cards, or Center replacement.

Police Card Rules

Placing Police Cards

- If a Police card's left and right colors each match that zone's left and right colors, place that Police card in that zone.
 - (Police left color = zone left color) AND (Police right color = zone right color)
- If no such zone exists, place the Police card in the Unplaced Area.

Repositioning Police Cards

- Whenever the Center changes (i.e., a Jewel card in the Center is replaced), immediately reposition all Police cards.
- How to reposition:
 1. Gather all Police cards on the table (both those placed in zones and those in the Unplaced Area).
 2. Re-apply the placement rules in "reveal order" (starting from the Police card that was revealed earliest).
- Because Police cards with the same left/right color combination do not repeat, no zone can ever hold more than 1 Police card.

Safe/Danger Check (Recalculated at the Moment of Resolution)

At the moment a submitted card X is being resolved:

1. Find the zone in the current 5-card Center (0, 3 Jewels, 40) where X belongs (left boundary < X < right boundary).
2. If that zone contains a Police card, X is a "Danger card"; otherwise it is a "Safe card."

Note: Because earlier resolutions may change the Center/Police layout, Safe/Danger is recalculated for every single card as it is resolved.

Turn Sequence

Each turn proceeds as follows:

1. Reveal 2 Police cards from the Police deck and place them.
 - If the Police deck is empty, gather the discarded Police cards, shuffle them face down to form a new Police deck, then perform this step.
2. Each player chooses 1 card from their hand and submits it face down in front of them.
3. After everyone has submitted, reveal all submitted cards simultaneously.
4. Resolve the revealed cards one by one in order (see "Resolution Priority" below).
5. After all submitted cards this turn are resolved, check whether the round ends.

Resolution Priority

Resolve cards in the following order. The order can change with each card resolved; determine which card to resolve anew each time.

- If there is at least 1 Safe card: resolve the Safe card with the smallest number.
- If there are no Safe cards: resolve the smallest-numbered card among all submitted cards.

Resolving Cards (Center Replacement Rule)

The Center must always contain exactly one Jewel card of each color.

Therefore, when a card X is resolved, the one Jewel card in the Center that shares X's color must leave the Center, and X is placed in the position that keeps the Center in ascending order.

Resolving a Safe Card

1. Take the Jewel card in the Center that is the same color as X and place it face up in front of the submitter.

Resolving a Danger Card

1. Discard the Police card placed in the zone that contains X.
2. Take the Jewel card in the Center that is the same color as X and place it face down in front of the submitter.

Common (after each card resolution)

1. Add submitted card X to the Center.
2. Reposition Police cards.

End of Round

Round end is checked only after a turn is fully complete (after all submitted cards have been resolved). The round ends when all players have submitted their last hand card. (Having 3 or more face-down cards does not end the round.)

Round Scoring

Each player gains points equal to the total on the face-up cards in front of them, and loses points equal to the total on the face-down cards in front of them. A player's round score may become negative as a result.

Final Victory

After all rounds end, the player with the highest cumulative total of round scores wins.
